Abstract: Mobile learning or we can simply refer to it as learning is a process of learning via the internet network using mobile devices like smartphones, tablets, laptops, and a lot more. M-learning has increasingly become a popular trend around the globe. Moreover, Learning English is skill-based learning that requires various approaches and techniques. So, the use of technology like mobile applications is the latest solution to solve the challenges of learning English. The study aims to develop a mobile application for students to learn English grammar but delivered in our mother tongue language which is the Malay language. The application helps students learn in their leisure time without the presence of their teacher. The software development methodology that will be used in this project is the incremental model.

Keywords: Duolingo, Learn English Grammar, Mobile Learning.
